Abstract

➤ Normal life can be stressful, and people need to relax. Being entertained by others is a wonderful way to take some time out of life. It can reduce stress and make life's issues easier to face. The media and entertainment industry consists of film, television, radio and print. These segments include movies, TV shows, radio shows, news, music, newspapers, magazines, and books. Entertainment industry is a group of sub-industries devoted to entertainment. Entertainment industry is used to describe the mass media companies that control the distribution and manufacture of mass media entertainment.

Given Tasks

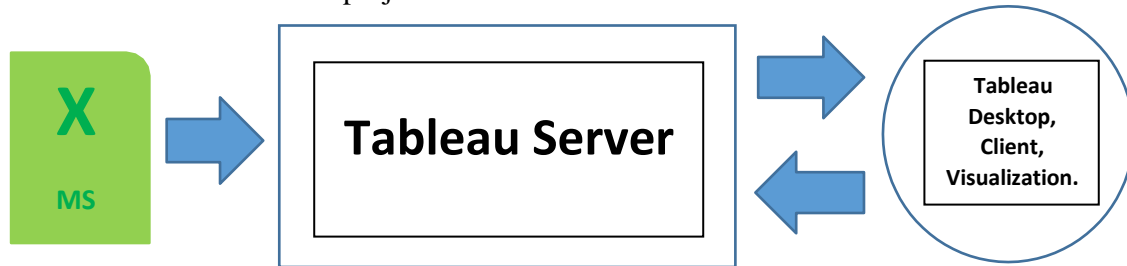

- **Task #1** - In a word document write the process and data added to the current dataset. In addition, mention the theme on which you will be creating the dashboard.
- **Task #2** - You can add your data as per your convenience.
- **Task #3** – Do the data preparation part.
- **Task #4** – Build the dashboards
- **Task #5** – Build a Storyline

Scope

- The main theme is on number of awards won by entertainers throughout their life. We created two dashboards showing their award-winning performance, dashboards show the highest number of nominees, Oscar awards, Emmy awards, Grammy awards, and other awards, etc.
- The main theme is to create dashboards on top entertainers with their highest number of awards and nominees and make a visualization on it.

Architecture

- The architecture of entire project is shown below:

- Our entire data source is our excel file. This excel file is connected to the tableau server. From the server, data can be shown and accessed.
- Tableau server has various architectural components regarding to solve the query.
- The functionalities show the result according to query entered by the end user or client.
- Screen of Tableau desktop, client and various charts and dashboard (screen) of Tableau are present at client side.
- Client entered the query to show the graph, after selecting the data in form of rows and columns it will go inside the tableau server. In tableau server, it understands the query and generates the best recommended charts based on selected data and return it into the tableau screen.
- Based on recommended charts, client can make the visual aspect of the same.
- If client is not satisfied with the result, he/she has to select data accordingly otherwise make required changes to show the expected result.

Data Description

- Data was given into three parts in excel file which are Entertainer – Basic Info, Entertainer – Breakthrough Info and Entertainer - Last work Info.
- Basic Info includes name, gender and birth year of entertainer.
- Breakthrough Info includes year of breakthrough/#1 hit/award nomination, breakthrough name, year of first Oscar/grammy/emmy along with name of entertainers.
- Last work Info includes last major work (arguable), year of death (if they are) along with name of entertainers.
- Glimpse of Entertainer – Basic Info:

- Glimpse of Entertainer – Breakthrough Info:

➤ Glimpse of Entertainer – Last work Info

- After this, I combined this data into one sheet named Entertainer – Final, but this data isn't sufficient to do analysis and make dashboard on it. For this, I have added some external information like awards they won, nominees etc. from IMDb's official website ([IMDb](https://www.imdb.com)).
- After some processing data looks like this:

	G	H	I	J	K	L	M	N	O	P	Q
1	Year of Last Major Work (arguable)	Year of Death	Award Won from Breakthrough	Total Awards won	Total Nominees	Profession	Oscar Won	Grammy Won	Emmy Won	Other Awards

- **Entertainer:** Name of the entertainer.
- **Gender (traditional):** Gender of that entertainer
- **Birth Year:** Birth year of that entertainer
- **Year of Breakthrough/#1 hit/Award Nomination:** Here, breakthrough means super hit or career changing performance. Column shows year of breakthrough.

- **Breakthrough Name:** Name of breakthrough. It can be either musical album or TV show or movie.
- **Year of first Oscar/Grammy/Emmy:** Year if first mega award they won.
- **Year of Last Major Work (arguable):** Last major show or movie or album. You can also say last appearance.
- **Year of Death:** Entertainer's year of death, if they die.
- **Award won from Breakthrough:** Any award/s from breakthrough. I only wrote mega awards they won in this column. If they had other awards for breakthrough, I wrote "other", if they haven't, I wrote "No Award". If they have mega award, I wrote that award name.
- **Total Awards Won:** Total awards that entertainer won throughout.
- **Total Nominees:** Total nominees for they have chosen for award.
- **Profession:** Category of entertainer either singer or actor. Pop stars and dancers are included in singer and TV hosts and TV actors are included in actors.
- **Oscar won:** Number of total Oscar awards they won.
- **Grammy won:** Number of total Grammy awards they won.
- **Emmy won:** Number of total Emmy awards they won.
- **Other Awards:** Number of other awards they won apart from Oscar, Grammy and Emmy.

Connect Data with Tableau & Deployment

- Open Tableau Public in your desktop.
- First screen: connect your files from various sources like MS Excel, SQL Server, Tableau Server etc.
- Make sure internet connection is stable while working with tableau.
- After completion of work, you can simply press ctrl + s or save it from file menu. It will let you to tableau public's website and prompt for signing in. After sign-in, your work will be saved in tableau's website.
